## PROFILE

Dr Michail Arvanitidis (PT, PhD, MSc, MMACP) is a Postdoctoral Research Fellow at the Centre of Precision Rehabilitation for Spinal Pain (CPR Spine), School of Sport, Exercise and Rehabilitation Sciences, University of Birmingham, United Kingdom. His current research examines cervical adaptations in NASA astronauts following spaceflight, aiming to enhance astronaut health for future missions. His main interests involve studying motor adaptations in pain-affected or vulnerable populations. He works principally with high-density surface electromyography, motor unit decomposition and isokinetic dynamometry, and has published 29 peer-reviewed papers (10 as first author). He holds a European Commission Seal of Excellence for the MSCA Postdoctoral Fellowship proposal PRO-AGE (91.8/100).

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                               |                     |

## AWARDS & DISTINCTIONS

- Seal of Excellence**, European Commission — Horizon Europe MSCA Postdoctoral Fellowships 2025, proposal PRO-AGE (101274439), score 91.8/100; host: Aristotle University of Thessaloniki. **2026**

- Level 2 CPD Award (£1,500), Musculoskeletal Association of Chartered Physiotherapists. [2024](#)
- Level 2 Research Award (£1,500), Musculoskeletal Association of Chartered Physiotherapists. [2024](#)
- Shortlisted, Oral Student Presentation Awards, XXIV Congress of the International Society of Electrophysiology and Kinesiology. [2022](#)
- IFOMPT Travel Bursary Award (£500), Musculoskeletal Association of Chartered Physiotherapists. [2020](#)
- Honorary fellowship for distinction in BSc studies, National Scholarships Foundation, University of Thessaly. [2011–12](#)

## RESEARCH FUNDING

---

- **UK Space Agency** (co-applicant) — *Cervical spine and muscle adaptation after spaceflight and relationship to herniation risk*. £97,000 (2025–26); £486,183 (2022–25); £116,341 (2021–22).
- **The Royal Society** (co-applicant) — *Real-time augmented reality feedback of muscle activity to enhance human performance*. £11,907. Contributed to the writing of the application.

## PUBLICATIONS — UNDER REVIEW & IN PREPARATION

---

1. Mendez-Rebolledo G, **Arvanitidis M**, Martinez-Valdes E. Altered neural drive to the fibularis longus during progressive loading in chronic ankle instability. *Journal of Applied Physiology*. Under review.
2. Contreras-Hernandez I, Falla D, **Arvanitidis M**, Negro F, Jimenez-Grande D, Martinez-Valdes E. Eccentric and concentric torque feedback training induce similar clinical improvements but distinct triceps surae motor unit adaptations in non-insertional Achilles tendinopathy: a randomised controlled trial. *Journal of Sport and Health Science*. Under review · preprint on medRxiv. doi: 10.1101/2025.06.20.25330016
3. Parrella M, **Arvanitidis M**, Borzuola R, Macaluso A, Falla D. Effects of ageing on fatigue resistance and neuromuscular control of the trunk extensor muscles during isokinetic contractions. *Journal of Applied Physiology*. Under review.
4. Purushotham S, Casolo A, **Arvanitidis M**, Grison A, Gardner A, Falla D. Erector spinae muscle fibre size estimation using high-density surface electromyography in people with and without non-specific chronic low back pain. *Scientific Reports*. Under review.
5. McIntosh J, Sidiropoulos G, **Arvanitidis M**, Falla D. The effect of neck-specific exercise on neck muscle morphology in people with chronic neck pain: a systematic review and meta-analysis. *Musculoskeletal Science and Practice*. Under review.
6. **Arvanitidis M**, Contreras I, Negro F, Martinez-Valdes E. Assessing the interplay between neural drive and muscle contraction dynamics during postural tasks in older individuals. *The Journal of Physiology*. In preparation.
7. **Arvanitidis M**, Cerone GL, Gazzoni M, Falla D. Real-time augmented reality biofeedback from high-density surface electromyography improves knee extensor endurance performance in humans. *British Journal of Sports Medicine*. In preparation.

## SELECTED CONFERENCE PRESENTATIONS

---

### Oral

- **Invited talk** — Neuromuscular adaptations of the trunk extensor muscles in chronic non-specific low back pain: clinical implications. Special session EE6, 33rd Panhellenic Scientific Congress of Physiotherapy, Athens. **March 2026**
- Spaceflight-associated changes in cervical spine structure, muscle function and disc health in astronauts. EUROSPINE Annual Meeting; 10th Forschungssymposium Physiotherapie. **2026**
- Association between patellar tendon morphomechanical characteristics, quadriceps muscle architecture and motor unit firing properties. XXVI Congress, ISEK. **2026**
- Associations between delayed onset trunk muscle soreness, altered EMG–torque relationships and lumbar kinematics in dynamic contractions. XXV Congress, ISEK. **2024**
- Reduced lumbar extensor torque steadiness is associated with increased erector spinae activity during eccentric contractions in chronic low back pain. XXIV Congress, ISEK. **2022**
- Lumbar extensor isometric torque steadiness and torque–HDsEMG coherence is altered in chronic low back pain. XXVIII Congress, International Society of Biomechanics. **2021**
- Effect of a dynamic isokinetic fatiguing task on the spatial distribution of erector spinae activity in low back pain. XXIII Congress, ISEK. **2020**

### Poster

- Altered motor unit behaviour and torque steadiness in athletes with patellofemoral pain during single- and multi-joint exercises. International MotoNeuron Society Meeting. **2025**
- Evaluation of neck force control and neck muscle activation in astronauts post-spaceflight. XXV Congress, ISEK; PAINWeek. **2024**
- Associations between impaired dynamic trunk muscle control in chronic low back pain and altered spatial EMG–torque correlations. XXV Congress, ISEK. **2024**
- Design, development and experimental validation of an augmented reality biofeedback system providing information about muscle activation through HD-sEMG. XXV Congress, ISEK. **2024**
- Effect of high-density surface EMG visual feedback on shoulder-abduction endurance: a pilot study. Physiotherapy UK. **2019**

## TEACHING & MENTORING

---

- **Neuromuscular Adaptations to Training** — postgraduate practical laboratories in isokinetic dynamometry and high-density EMG, University of Birmingham.  
Annually 2020–2025 · ~204 students
- **Analysis of Motor Performance** — undergraduate practical laboratories in isokinetic dynamometry and high-density EMG, University of Birmingham.  
Annually 2022–2025 · ~357 students

- **Invited lecturer**, MSc Advanced Physiotherapy, University of Thessaly, Greece — “The role of high-density surface EMG in the assessment and treatment of musculoskeletal disorders: clinical applications”.  
Annually 2021–2025 · ~66 students
- **Supervision and mentoring** — co-supervision of 20+ PhD, MSc and BSc research projects spanning trunk and neck neuromuscular control, tendinopathy, AR biofeedback and systematic review methodology; host and mentor to visiting doctoral researchers from partner institutions across Europe, and supervisor of MSc/BSc research placements in HD-sEMG and isokinetic dynamometry.  
University of Birmingham, 2022–present

## PROFESSIONAL SERVICE

---

- **External examiner**, postgraduate research degrees — MSc by Research thesis examination, Manchester Metropolitan University, UK. [May 2026](#)
- **Journal peer reviewer** — Applied Psychophysiology and Biofeedback; BMC Musculoskeletal Disorders; Clinical Biomechanics; European Journal of Applied Physiology; European Spine Journal; Journal of Applied Biomechanics; Journal of Applied Physiology; Journal of Biomechanics; Journal of Electromyography and Kinesiology; Journal of Sports Sciences; Musculoskeletal Science and Practice; Occupational and Environmental Medicine; PLOS ONE; Scientific Reports.
- **Patient and Public Involvement** — presentations and interactive discussions with people living with chronic spinal pain via the CPR Spine PPI panel, integrating public feedback into study design, University of Birmingham. [2019–2024](#)
